

**RELEASE OF BOIL WATER NOTIFICATION
RED RIVER AUTHORITY'S
LAKE ARROWHEAD WATER SYSTEM
WEST SIDE CUSTOMERS
November 14, 2017**

The Authority has conducted bacteriological sampling in the Lake Arrowhead Water System on the east side and all samples results indicate that the water is free of bacteria. Therefore, effective immediately, you no longer need to boil the water before drinking, cooking, or making ice.

The Authority will continue to take regular monthly bacteriological samples from the system as required and will notify you should any problems arise.

The Authority appreciates your continued support of the system and should you have any questions or need further information, please feel free to call Jon Faris at (940) 636-8232.

Sincerely,

RED RIVER AUTHORITY OF TEXAS

Randy Whiteman
Assistant General Manager
